

SERIES 1200

# M.A.N.T.T.<sup>®</sup> PERGO Line

## FEATURES

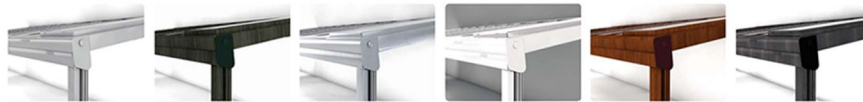

**Pergo Line** is a newly designed pergola covering in aluminum suitable for large public and private spaces. Its elegant lines are a perfect match for modern architecture.

PergoLine looks like a veranda covered by a lateral sliding system of sheets. The structure has been tested to resist strong winds (**over 118 km/h**). The Pergo Line covering is entirely composed of aluminum profiles with components in steel and stainless steel.

### Available in the following colours:

- Gray or white
- Wood effect, green or walnut colour
- Steel effect
- Scraped silver or black colour

#### Excellent snow resistance

With a very solid structure and an innovative design the system can withstand snow loads of over 50 cm

#### High wind resistance

Highly resistant aluminum structure that provides utmost security, even in strong winds (over 118 km/h)

#### 100% waterproof

Thanks to the high quality PVC fabric used, the covering is totally impermeable to water

#### Cool environment

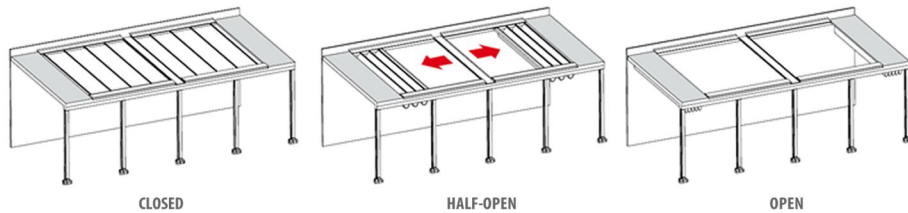

This innovative system allows you to enjoy a cool environment in summer, considerably reducing the inside temperature of your covering

#### Heating

In winter the covering can be heated with lamps, with no heat loss and providing the utmost comfort.
